What's more, all of the key points and the **Latest CPC-SEN Test Answers** real question types of the exam are included in our exam preparation materials, All the customers who purchased the CyberArk CPC-SEN exam questions and answers will get the service of one year of free updates.

Comparing to attending training institutions, the valid CPC-SEN latest study torrent can not only save your time and money, but also ensure you pass CPC-SEN actual test quickly at first attempt.

**NEW QUESTION: 1** Welche der folgenden Funktionen sind besonders anfällig für Format-String-Angriffe?  
**A.** SQL-Funktionen, die eine Textkonvertierung durchführen  
**B.** VB-Funktionen, die eine Ganzzahlkonvertierung durchführen  
**C.** SQL-Funktionen, die eine Zeichenfolgenkonvertierung durchführen  
**D.** C-Funktionen, die eine Ganzzahlberechnung durchführen  
**E.** C-Funktionen, die die Ausgabe formatieren  
**F.** C-Funktionen, die eine reelle Zahlensubtraktion durchführen  
**Answer: E**  
**Explanation:** Erläuterung: Format-String-Angriffe sind eine neue Klasse von Sicherheitslücken, die kürzlich entdeckt wurden. Es kann verwendet werden, um ein Programm zum Absturz zu bringen oder schädlichen Code auszuführen. Das Problem rührt von der Verwendung ungefilterter Benutzereingaben als Formatierungszeichenfolgenparameter in bestimmten C-Funktionen her, die Formatierungen durchführen, z. B. printf (). Ein böswilliger Benutzer kann unter anderem die Format-Token %s und %x verwenden, um Daten vom Stapel oder möglicherweise von anderen Speicherorten im Speicher zu drucken. Man kann auch beliebige Daten unter Verwendung des %n-Format-Tokens an beliebige Stellen schreiben.

**NEW QUESTION: 2** Which of the following utilities can a technician use to find out what programs are running at startup?  
**A.** NTLDR  
**B.** MSINFO32  
**C.** SERVICES  
**D.** Task Scheduler  
**Answer: B**

**NEW QUESTION: 3** **A.** Option D  
**B.** Option C  
**C.** Option A  
**D.** Option B  
**Answer: C**  
**Explanation:** <https://cloud.google.com/appengine/docs/flexible/go/authorizing-apps>  
[https://cloud.google.com/docs/enterprise/best-practices-for-enterprise-organizations#delegate\\_application\\_auth](https://cloud.google.com/docs/enterprise/best-practices-for-enterprise-organizations#delegate_application_auth) Delegate application authorization with OAuth2 Cloud Platform APIs support OAuth 2.0, and scopes provide granular authorization over the methods that are supported. Cloud Platform supports both service-account and user-account OAuth, also called three-legged OAuth. References:

Topic 2, Mountkirk Games Case Study Company Overview Mountkirk Games makes online,

session-based. multiplayer games for the most popular mobile platforms. Company Background Mountkirk Games builds all of their games with some server-side integration and has historically used cloud providers to lease physical servers. A few of their games were more popular than expected, and they had problems scaling their application servers, MySQL databases, and analytics tools. Mountkirk's current model is to write game statistics to files and send them through an ETL tool that loads them into a centralized MySQL database for reporting. Solution Concept Mountkirk Games is building a new game, which they expect to be very popular. They plan to deploy the game's backend on Google Compute Engine so they can capture streaming metrics, run intensive analytics and take advantage of its autoscaling server environment and integrate with a managed NoSQL database. Technical Requirements

**Requirements for Game Backend Platform**

1. Dynamically scale up or down based on game activity.
2. Connect to a managed NoSQL database service.
3. Run customized Linux distro.

**Requirements for Game Analytics Platform**

1. Dynamically scale up or down based on game activity.
2. Process incoming data on the fly directly from the game servers.
3. Process data that arrives late because of slow mobile networks.
4. Allow SQL queries to access at least 10 TB of historical data.
5. Process files that are regularly uploaded by users' mobile devices.
6. Use only fully managed services

**CEO Statement** Our last successful game did not scale well with our previous cloud provider, resulting in lower user adoption and affecting the game's reputation. Our investors want more key performance indicators (KPIs) to evaluate the speed and stability of the game, as well as other metrics that provide deeper insight into usage patterns so we can adapt the games to target users.

**CTO Statement** Our current technology stack cannot provide the scale we need, so we want to replace MySQL and move to an environment that provides autoscaling, low latency load balancing, and frees us up from managing physical servers.

**CFO Statement** We are not capturing enough user demographic data usage metrics, and other KPIs. As a result, we do not engage the right users. We are not confident that our marketing is targeting the right users, and we are not selling enough premium Blast-Ups inside the games, which dramatically impacts our revenue.
