**NEW QUESTION: 2**Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2012. You create a security template named Template1 by using the Security Templates snap-in. You need to Apply Template1 to Server2. Which tool should you use?**A.** Security Templates**B.** Local Security Policy**C.** Server Manager**D.** Authorization Manager**Answer: C****Explanation:**The Security Configuration Wizard (SCW) guides you through the process of creating, editing, applying, or rolling back a security policy. You can run SCW from Administrative Tools or Server Manager. Note:\* Security templates provide standard security settings to use as a model for your security policies. They help you troubleshoot problems with computers whose security settings are not in compliance with policy or are unknown. Security templates are inactive until imported into a Group Policy object or the Security Configuration and Analysis snap-in to MMC.
