NEW QUESTION: 1 Identify the two items that the intercompany Reconciliation reports display.
A. intercompany receivables and intercompany payables lines generated for the provider and receiver of each intercompany transaction
B. ledger balancing lines generated when the primary balancing segment value is in balance, but either the second balancing segment or the third balancing segment is out of balance
C. clearing company balance lines
D. intercompany receivables and intercompany payables lines generated by the intercompany balancing feature

Answer: A, D
Explanation: Intercompany Reconciliation: Explained The main goal of the reports is to make it easy for you to identify either the receiver side or provider side of a transaction that has not been posted to the intercompany receivables or intercompany payables account. The reports show the following intercompany lines:
*(B) Intercompany receivables and intercompany payables lines generated by the intercompany balancing feature
*(C) Intercompany receivables and intercompany payables lines generated for the provider and receiver of each intercompany transaction
*(not A) Ledger balancing lines generated when the primary balancing segment value is in balance but either the second balancing segment or the third balancing segment is out of balance
*(not D) Clearing company balancing lines
The following are not included on the intercompany reconciliation reports: Reference: All > Financial Control and Reporting > Close Accounting Period > Reconcile Accounts, Intercompany Reconciliation: Explained

NEW QUESTION: 2 Click on the exhibit. Given the following: * On the OC-3 port, each provisioned channel group contains all available timeslots. The command result illustrates which OC-3 port characteristic?
