**NEW QUESTION: 1**A legacy system is used as a shared resource by a number of services within a service inventory. The services that access the legacy system use the same user account. The legacy system is also directly accessed by other applications that also use the same set of credentials as the services. It was recently reported that a program gained unauthorized access to confidential data in the legacy system. However, because all of the programs that access the legacy system use the same set of credentials, it is difficult to find out which program carried out the attack. How can another attack like this be avoided?**A.** The Message Screening pattern can be applied to monitor incoming request messages.**B.** None of the above.**C.** The Service Perimeter Guard pattern can be applied so that all programs that are not services are required to access the legacy system via a perimeter service.**D.** The Trusted Subsystem pattern can be applied to avoid direct access to the legacy system by any program except a designated service.**Answer: D**

**NEW QUESTION: 2**When designing a FTP link, what radio parameters will impact the maximum possible throughput of the link (select TWO)?**A.** Selected modulation**B.** Diversity spacing**C.** Antenna polarization**D.** Selected channel width**E.** Radio power output**Answer: A,D**
