NEW QUESTION: 1Which command is used to generate the output from an Alcatel-Lucent 7750 SR shown below?**A.** Show service 3 detail**B.** Show service id 3 detail**C.** Show service 3**D.** Show service id 3**E.** Show service id 3 base**F.** Show service 3 base**Answer: E**

NEW QUESTION: 2A company has a network of branch offices with local file/print and mail servers; each branch individually contracts a hot site. Which of the following would be the GREATEST weakness in recovery capability?**A.** Exclusive use of the hot site is limited to six weeks**B.** The provider services all major companies in the area**C.** The time of declaration determines site access priority**D.** The hot site may have to be shared with other customers**Answer: B**
Explanation:ExplanationSharing a hot site facility is sometimes necessary in the case of a major disaster. Also, first come, first served usually determines priority of access based on general industry practice. Access to a hot site is not indefinite; the recovery plan should address a long-term outage. In case of a disaster affecting a localized geographical area, the vendor's facility and capabilities could be insufficient for all of its clients, which will all be competing for the same resource. Preference will likely be given to the larger corporations, possibly delaying the recovery of a branch that will likely be smaller than other clients based locally.
