However, your capacity for work directly proves your value.

**NEW QUESTION: 1**Sensitivity labels are an example of what application control type?**A.** Compensating administrative controls**B.** Detective security controls**C.** Preventive security controls**D.** Preventive accuracy controls**Answer: C****Explanation:**Sensitivity labels are a preventive security application controls, such as are firewalls, reference monitors, traffic padding, encryption, data classification, one-time passwords, contingency planning, separation of development, application and test environments.The incorrect answers are: Detective security controls - Intrusion detection systems (IDS), monitoring activities, and audit trails.Compensating administrative controls - There no such application control.Preventive accuracy controls - data checks, forms, custom screens, validity checks, contingency planning, and backups.Sources:KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the TenDomains of Computer Security, John Wiley & Sons, 2001, Chapter 7: Applications and Systems Development (page 264).KRUTZ, Ronald & VINES, Russel, The CISSP Prep Guide: Gold Edition, Wiley PublishingInc., 2003, Chapter 7: Application Controls, Figure 7.1 (page 360).

**NEW QUESTION: 2**DRAG DROPNote: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.You plan to implement the new mobile device mailbox policy based on the technical requirement.Which mobile device mailbox policy will apply to VPUser1, VPUser2, and VPUser3? To answer, drag the appropriate mobile device mailbox policies to the correct users. Each mobile device mailbox policy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:Confusingly, the policy that Exchange Server 2010 and 2013 create automatically during setup is called "Default". However the name "Default" is not the true indication of which policy is the default.Instead it is the IsDefaultPolicy (for Exchange 2010) or IsDefault (for Exchange 2013) property that actually determines which one is the default policy. ForVPUser1's mailbox we see that the ActiveSyncMailboxPolicyIsDefaulted property is set to True. This means that if we change the default mobile device mailbox policy to a different policy, that change will also take effect for VPUser1.VPUser2 is configured with a mobile device policy named Restricted. This means that if we change the default mobile device mailbox policy to a different policy, that change will not take effect for VPUser2, and he will remain on the same policy.VPUser3 is assigned to the "Default" policy again (see And also from scenario below), but the ActiveSyncMailboxPolicyIsEnabled property is still set to False. This means that VPUser3 will remain configured with the policy named "Default" even if the default is changed to a different policy.From the scenario:Name: VPUser1ActiveSyncMailboxPolicy: Default ActiveSyncMailboxPolicyIsDefaulted: TrueName: VPUser2ActiveSyncMailboxPolicy: Restricted ActiveSyncMailboxPolicyIsDefaulted: FalseName: VPUser3ActiveSyncMailboxPolicy: Default ActiveSyncMailboxPolicyIsDefaulted: FalseAnd also from scenario:Contoso plans to introduce a new mobile device mailbox policy by running the New- MobileDeviceMailboxPolicy-Name "Unrestricted"-PasswordEnabled \$true- AlphanumericPasswordRequired \$true- PasswordRecoveryEnabled \$true-IsDefault \$true- AttachmentsEnabled

\$true-AllowStorageCard \$true command.References:
