**NEW QUESTION: 1** During an application audit, an IS auditor finds several problems related to corrupted data in the database. Which of the following is a corrective control that the IS auditor should recommend? **A.** Ensure that only authorized personnel can update the database. **B.** Establish controls to handle concurrent access problems. **C.** implement data backup and recovery procedures. **D.** Define standards and closely monitor for compliance. **Answer: C**  
Explanation: Explanation/Reference: Explanation: Implementing data backup and recovery procedure is a corrective control, because backup and recovery procedures can be used to roll back database errors. Defining or establishing standards is a preventive control, while monitoring for compliance is a detective control. Ensuring that only authorized personnel can update the database is a preventive control. Establishing controls to handle concurrent access problems is also a preventive control.

**NEW QUESTION: 2** Refer to the exhibit. Drag and drop the code snippets from the left onto the item numbers on the right that match the missing sections in the curl exhibit to complete the cURL request to FirePower Device Manager API to create objects.
