To get things working well for you in the online VMware 5V0-33.23 video lectures go for none other than updated Estruturit 5V0-33.23 audio study guide and Estruturit's VMware 5V0-33.23 classroom training online and these tools are really having great time in the certification process.

VMware 5V0-33.23 App online version- Be suitable to all kinds of equipment or digital devices, Our vibrant community of experts and certified professionals is a powerful resource pool of tips, tricks, and insightful advice.

**NEW QUESTION: 1** The compute resource center issued smartphones to all first-level and above managers. The managers have the ability to install mobile tools. Which of the following tools should be implemented to control the types of tools the managers install?  
**A.** Application manager  
**B.** Content manager  
**C.** Download manager  
**D.** Segmentation manager  
**Answer: A**

**NEW QUESTION: 2** **A.** Option B **B.** Option D **C.** Option C **D.** Option A  
**Answer: D**  
**Explanation:** Topic 1, Contoso, Ltd Case A Overview Contoso, Ltd., is a recruiting and staffing company that has offices throughout North America. The company has a main office and six branch offices. The main office is located in Miami. The branch offices are located in New York, Seattle, Los Angeles, Montreal, Toronto, and Vancouver. Existing Environment Network Infrastructure The network contains one Active Directory domain named contoso.com. The main office has the following servers:  
\* One file server that maintains multiples shares  
\* Two domain controllers configured as DNS servers  
\* One Windows Server Update Services (WSUS) server  
\* Two DHCP servers that each have a scope for all of the subnets  
\* Two servers that have Failover Clustering configured and are used as virtualization hosts  
\* One server that has Microsoft SQL Server 2012 installed and maintains a customer relationship management (CRM) database  
Each branch office has the following servers:  
\* One domain controller configured as a DNS server  
\* One DHCP server that has a single scope for its respective office  
Each office has a single subnet. The network speed of the local area network (LAN) is 1 gigabit per second. All of the offices have a high-speed connection to the Internet. The offices connect to each other by using VPN appliances. Current Issues Users report that it can take a long time to download files from network shares in the

main office. A root cause analysis identifies that network traffic peaks when the users experience this issue.

**Requirements**

**Planned Changes**

The company plans to implement the following changes:

- \* Replace all of the domain controllers with new servers that run Windows Server 2012.
- \* Upgrade the CRM application to use a web-based application that connects to the current CRM database. The web application will store session data in the memory of each web server.
- \* Initially, deploy two front-end web servers to two virtual machines. Additional virtual web servers will be deployed in the future.
- \* Monitor the availability of the CRM application and create alerts when the overall availability is less than 99 percent.
- \* Implement Microsoft System Center 2012 to manage the new environment.

**Business Requirements**

The company identifies the following business requirements:

- \* Minimize hardware costs and software costs whenever possible.
- \* Minimize the amount of network traffic over the VPN whenever possible.
- \* Ensure that the users in the branch offices can access files currently on the main office file server if an Internet link fails.

**Technical Requirements**

The company identifies the following technical requirements:

- \* Provide a highly available DHCP solution.
- \* Maintain a central database that contains the security events from all of the servers. The database must be encrypted.
- \* Ensure that an administrator in the main office can manage the approval of Windows updates and updates to third-party applications for all of the users.
- \* Ensure that all of the domain controllers have the `ReliableTimeSource` registry value in `HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\W32Time\Parameters` set to 1, even if an administrator changes that value manually.

**Virtualization Requirements**

The company identifies the following virtualization requirements:

- \* Minimize the number of permissions and privileges assigned to users.
- \* Ensure that the members of a group named `Group2` can add a WSUS server to the fabric.
- \* Ensure that a diagram view of the virtualization environment can be generated dynamically.
- \* Minimize the amount of administrative effort required to manage the virtualization environment.
- \* Prevent the failure of a front-end web server from affecting the availability of the CRM application.
- \* Ensure that the members of a group named `Group1` can create new virtual machines in the Los Angeles office only.
- \* Only create virtual machine templates by using objects that already exist in the System Center 2012 Virtual Machine Manager (VMM) library.
- \* On the failover cluster in the main office, apply limited distribution release (LDR) updates to the virtualization hosts without disrupting the virtual machines hosted on the virtualization hosts.

**NEW QUESTION: 3** In Avaya Aura Experience Portal, prior to conducting a system restore, which script should be run to mount the backup device onto the Linux file system?  
**A.** `do_RestoreData`  
**B.** `do_MntDrv`  
**C.** `bkup_system`  
**D.** `sys_details`  
**Answer: A**
