NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com.All servers run Windows Server 2012 R2.An application named Appl.exe is installed on all client computers. Multiple versions of Appl.exe are installed on different client computers. Appl.exe is digitally signed.You need to ensure that only the latest version of Appl.exe can run on the client computers.What should you create?**A.** An application control policy executable rule**B.** An application control policy packaged app rule**C.** An application control policy Windows Installer rule**D.** A software restriction policy certificate rule**Answer: A**Explanation:

Explanation/Reference:Explanation:Executable Rules, for .exe and can be based on Publisher, Product name, filename and version. Use Certificate Rules on Windows Executables for Software Restriction Policies This security setting determines if digital certificates are processed when a user or process attempts to run software with an.exe file name extension. This security setting is used to enable or disable certificate rules, a type of software restriction policies rule. With software restriction policies, you can create a certificate rule that will allow or disallow software that is signed by Authenticode to run, based on the digital certificate that is associated with the software. In order for certificate rules to take effect, you must enable this security setting. When certificate rules are enabled, software restriction policies will check a certificate revocation list (CRL) to make sure the software's certificate and signature are valid. This may decrease performance when start signed programs. You can disable this feature. On Trusted Publishers Properties, clear the Publisher and Timestamp check boxes.

NEW QUESTION: 2境界ルーターの外部インターフェイスFastEthernet

1/0に適用される次のアクセスリストは何を達成しますか？**A.**
