All the questions cover the main points which HPE0-V26 actual exam required, With real exam questions to prepare with, the candidates get all the knowledge and take Hybrid Cloud exam without any problems.

NEW QUESTION: 1 DRAG DROP A company has one data center site running 50 hosts and 400 virtual machines and requires a vSphere 6.5 design. 1. The CIO wants to add a secondary site for Disaster Recovery (DR) with A hours RPO. 2. The application developer is concerned about anticipated growth as several new projects begin. 3. The CISO is worried about data leaks and theft. 4. The CTO would like to buy new servers with better specifications and higher consolidation ratio. Determine the critical requirements for each of the key stakeholders. Some requirements might have more than one stakeholder. **Answer:** Explanation:

NEW QUESTION: 2 Isolation and containment measures for a compromised computer have been taken and information security management is now investigating. What is the MOST appropriate next step? **A.** Make a copy of the whole system's memory **B.** Document current connections and open Transmission Control Protocol/User Datagram Protocol (TCP/UDP) ports **C.** Run a forensics tool on the machine to gather evidence **D.** Reboot the machine to break remote connections **Answer: A** Explanation: Explanation/Reference: Explanation: When investigating a security breach, it is important to preserve all traces of evidence left by the invader. For this reason, it is imperative to preserve the memory's contents of the machine in order to analyze them later. The correct answer is choice C because a copy of the whole system's memory is obtained for future analysis by running the appropriate tools. This is also important from a legal perspective since an attorney may suggest that the system was changed during the conduct of the investigation. Running a computer forensics tool in the compromised machine will cause the creation of at least one process that may overwrite evidence. Rebooting the machine will delete the contents of the memory, erasing potential evidence. Collecting information about current connections and open Transmission Control Protocol/User Datagram Protocol (TCP/UDP) ports is correct, but doing so by using tools may also erase memory contents.

NEW QUESTION: 3 Which of the following statements regarding ATP checks in SAP ECC that are triggered from customer orders is correct? **A.** An ATP check creates fixed links between customer orders and their confirmed receipts. **B.** The ATP check does not take stocks and receipts into account. It checks consumption of planned independent requirements. **C.** The ATP

quantity is the available quantity, which can be used to confirm incoming customer orders.**D.** If the ATP check determines non-availability. It then checks in the next step whether it is possible to procure or produce in time.**Answer: D**

NEW QUESTION: 4Nursing care of the infant prior to surgical closure of a meningomyelocele would include:**A.** Cover sac with saline-soaked sterile dressing**B.** Aspirate any fluid from sac**C.** Do not apply dressing; keep sac open to air**D.** Cover sac with dry sterile dressing**Answer: A**
Explanation:Explanation(A) A dry, sterile dressing would adhere to the sac, causing tissue damage. (B) A saline-soaked sterile dressing protects the sac from contamination by air and prevents drying. (C) A sac open to air causes drying and potential for contamination. (D) This intervention is not an independent nursing action.
