**NEW QUESTION: 1**The department of transportation for a major metropolitan area has placed sensors on roads at key locations around the city. The goal is to analyze the flow of traffic and notifications from emergency services to identify potential issues and to help planners correct trouble spots. A data engineer needs a scalable and fault-tolerant solution that allows planners to respond to issues within 30 seconds of their occurrence. Which solution should the data engineer choose?  
**A.** Collect the sensor data with Amazon Kinesis Firehose and store it in Amazon Redshift for analysis. Collect emergency services events with Amazon SQS and store in Amazon DynamoDB for analysis  
**B.** Collect both sensor data and emergency services events with Amazon Kinesis Streams and use Amazon DynamoDB for analysis  
**C.** Collect both sensor data and emergency services events with Amazon Kinesis Firehose and use Amazon Redshift for Analysis  
**D.** Collect the sensor data with Amazon SQS and store in Amazon DynamoDB for analysis. Collect emergency services events with Amazon Kinesis Firehose and store in Amazon Redshift for analysis  
**Answer: B**  
**Explanation:** Explanation

**NEW QUESTION: 2**The US department of Health, Education and Welfare developed a list of fair information practices focused on privacy of individually, personal identifiable information. Which one of the following is incorrect?  
**A.** There must be a way for a person to find out what information about them exists and how it is used.  
**B.** There must be a personal data record-keeping system whose very existence shall be kept secret.  
**C.** Any organisation creating, maintaining, using, or disseminating records of personal identifiable information must ensure reliability of the data for their intended use and must make precautions to prevent misuses of that data.  
**D.** There must be a way for a person to prevent information about them, which was obtained for one purpose, from being used or made available for another purpose without their consent.  
**Answer: B**  
**Explanation:** The question asks which is incorrect this is the correct answer because: There must not be personal data record-keeping systems whose very existence is secret  
The following answers are incorrect: All others options correct information practices. If the existence of such personal data record-keeping is kept secret then the person whose data is being kept cannot  
1. Find what information about them is in record and how it is being used.  
2. Prevent use of this information for use other purpose than intended one.  
The following reference(s) were/was used to create this question: The CISSP Prep Guide Ronald L Krutz, Russell D Vines Page 317.

**NEW QUESTION: 3**Which is NOT a prerequisite for serving data using the iSCSI protocol in Data ONTAP running in Cluster Mode?
