NEW QUESTION: 1 Given the content of the employee.txt file: Every worker is a master. Given that the employee.txt file is accessible and the file allemp.txt does NOT exist, and the code fragment: What is the result? **A.** Exception **1B.** Exception **2C.** The program executes, does NOT affect the system, and produces NO output. **D.** allemp.txt is created and the content of employee.txt is copied to it. **Answer: A**

NEW QUESTION: 2 **A.** Option **B.** Option **C.** Option **D.** Option **C** **Answer: B**

NEW QUESTION: 3 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have an Azure subscription that contains an Azure Storage account. You plan to implement changes to a data storage solution to meet regulatory and compliance standards. Every day, Azure needs to identify and delete blobs that were NOT modified during the last 100 days. Solution: You apply an Azure Blob storage lifecycle policy. Does this meet the goal? **A.** Yes **B.** No **Answer: A**
Explanation: Azure Blob storage lifecycle management offers a rich, rule-based policy for GPv2 and Blob storage accounts. Use the policy to transition your data to the appropriate access tiers or expire at the end of the data's lifecycle. The lifecycle management policy lets you: * Transition blobs to a cooler storage tier (hot to cool, hot to archive, or cool to archive) to optimize for performance and cost * Delete blobs at the end of their lifecycles * Define rules to be run once per day at the storage account level * Apply rules to containers or a subset of blobs (using prefixes as filters) Reference: <https://docs.microsoft.com/en-us/azure/storage/blobs/storage-lifecycle-management-concepts?tabs=azure-portal>
