Branch2 LANネットワーク172.16.10.0/24はEIGRPネットワークにアドバタイズされません

**Answer: D**

**NEW QUESTION: 2**What reference model describes computer communication services and protocols in a layered approach?**A.** OSI - Open System Interconnection**B.** ISO - International Standards Organization**C.** IETF - Internet Engineering Task Force**D.** IANA - Internet Assigned Numbers Authority**Answer: A**

**NEW QUESTION: 3**Get list of all the pods showing name and namespace with a jsonpath expression.**Answer:** Explanation:kubectl get pods -o=jsonpath="{.items[\*]['metadata.name'], 'metadata.namespace'}"

**NEW QUESTION: 4**A company uses Skype for Business Online. You use contoso.com as the verified domain name for the Office 365 tenant. Users conduct Skype online meetings. You add fabricam.com to the tenant and configure the tenant to use this domain name. You need to ensure that all Skype online meeting URLs contain the new domain name. Which Windows PowerShell cmdlet should you run?  
**A. Set-CsMeetingRoom**  
**B. New-CsSimpleURL**  
**C. Set-CsMeetingConfiguration**  
**D. Update-CsTenantMeetingUrl**  
**E. Set-CsUser**

**Answer: B**  
Explanation: The New-CsSimpleURL command Creates a new simple URL, which can then be added to a simple URL configuration collection. Simple URLs make it easier for users to join meetings and conferences, and also make it easier for administrators to log on to the Skype for Business Server Control Panel. Example: The example shows how a new URL can be added to an existing collection of simple URLs. To begin with, the first command in the example uses the New-CsSimpleUrlEntry cmdlet to create a URL entry that points to https://meet.fabrikam.com; this URL entry is stored in a variable named \$urlEntry. In the second command, the New-CsSimpleUrl cmdlet is used to create an in-memory-only instance of a simple URL. In this example, the URL Component is set to Meet; the domain is set to fabrikam.com; the ActiveUrl is set to https://meet.fabrikam.com; and the SimpleUrlproperty is set to \$urlEntry, with \$urlEntry being the URL entry created in the first command. After the URL has been created (and stored in the object reference \$simpleUrl) the final command in the example adds the new URL to the simple URL collection for the Redmond site. This is done by using the Set-CsSimpleUrlConfiguration cmdlet, the SimpleUrlparameter, and the parameter value @{Add=\$simpleUrl}. This syntax causes the URL stored in the object reference \$simpleUrl to be added to the SimpleUrl property.  
\$urlEntry = New-CsSimpleUrlEntry -Url "https://meet.fabrikam.com" \$simpleUrl = New-CsSimpleUrl -Component "meet" -Domain "fabrikam.com" -SimpleUrlEntry \$urlEntry -ActiveUrl "https://meet.fabrikam.com"  
Set-CsSimpleUrlConfiguration -Identity "site:Redmond" -SimpleUrl @{Add=\$simpleUrl}  
Incorrect: Not A: The Update-CsTenantMeetingUrl command updates the meeting URL for the specified Lync Online tenant. The updated URL uses a simpler, more standardized format that makes it easier for clients to locate and connect to meetings. Example: The command shown in example updates the meeting URL for the tenant with the tenantID 38aad667-af54-4397-aaa7-e94c79ec2308. (Note that you must supply the tenant ID in order for this command to complete.) After pressing ENTER to run the command, you will be asked if you are sure you want to update the meeting URL. You must answer yes to this prompt before Update-CsTenantMeetingUrl will actually make any changes to your Lync Online configuration settings.  
Update-CsTenantMeetingUrl -Tenant "38aad667-af54-4397-aaa7-e94c79ec2308"  
Not B: Set-CsMeetingConfiguration enables you to modify the meeting configuration settings currently in use in your organization. Meeting configuration settings help dictate the type of meetings (also called conferences) that users can create, and also control how (or even if) anonymous users and dial-in conferencing users can join these meetings. Note that these settings only affect scheduled meetings; they do not affect ad-hoc meetings created by clicking the Meet Now option in Skype for Business. Reference: New-CsSimpleUrl
