NEW QUESTION: 4 **A.** Option B **B.** Option D **C.** Option C **D.** Option A
Answer: B
Explanation: AWS CloudFormation is an application management tool which provides application modelling, deployment, configuration, management and related activities. The template is a JSON-format, text-based file that describes all the AWS resources required to deploy and run an application. It can have option fields, such as Template Parameters, Output, Data tables, and Template file format version. The only mandatory value is Resource. The user can define the AWS services which will be used/ created by this template inside the Resource section
