And all of the PDF version, online engine and windows software of the Advanced-Administrator study guide will be tested for many times, Passing the test Advanced-Administrator certification can help you realize your goal and if you buy our Advanced-Administrator latest torrent you will pass the Advanced-Administrator exam successfully.

NEW QUESTION: 1You need to perform a vulnerability scan for an App Engine app using Cloud Security Scanner. Upon completion of the scan, the report is not producing the expected number of webpage results. The pages in the app with mouseover menus are missing from the report. Which action should you take to make sure the scan completes and captures the menu?
A. Modify the scan schedule to return new results.**B.** Adjust the Google account on which the scan is running.**C.** Change the scan to include additional Starting URLs.**D.** Verify the Excluded URLs.
Answer: C
Explanation: A is not correct because the missing webpages in mouseover menu are unlikely to be explicitly excluded since they're expected to be scanned. B is not correct because changing the scan schedule will not result in scanning of more webpages. C is correct because Cloud Security Scanner may not be able to navigate through complex JavaScript such as a mouseover-driven multilevel menu. Specifying additional starting URLs can increase scan coverage in this scenario. D is not correct because changing the Google account will not result in scanning of more webpages.
