**NEW QUESTION: 1**To address shared monitoring and testing responsibilities in a cloud configuration, the provider might offer all these to the cloud customer except:**A.** SIM, SEIM, and SEM logs**B.** Security control administration**C.** Access to audit logs and performance data**D.** DLP solution results**Answer: B****Explanation:**ExplanationWhile the provider might share any of the other options listed, the provider will not share administration of security controls with the customer. Security controls are the sole province of the provider.

**NEW QUESTION: 2****A.** Azure File Storage**B.** Azure Blob storage**C.** Azure Cosmos DB**D.** Azure Data Lake**Answer: C**

**NEW QUESTION: 3**Which three statements about access lists are true? (Choose three.)**A.** Extended access lists should be placed as near as possible to the destination.**B.** Standard access lists should be placed as near as possible to the source.**C.** Standard access lists should be placed as near as possible to the destination.**D.** Standard access lists filter on the source address.**E.** Standard access lists filter on the destination address.**F.** Extended access lists should be placed as near as possible to the source.**Answer: C,D,F**

**NEW QUESTION: 4**What is Converged Networking?**A.** An approach to computer networking that allows network administrators to manage network services through abstraction of lower level functionality**B.** The creation of a computing fabric consisting of interconnected nodes that look a fabric when viewed collectively from a distance**C.** A system that changes its structure, behavior, or resources according to demand**D.** The ability to merge multiple data protocols (e.g. iSCSI, Fibre Channel, Ethernet) on the same server I/Q interface**Answer: A****Explanation:** Data centers built one-silo-at-a-time are inefficient and inflexible. HP ConvergedSystem

integrated systems give you the agility to adapt to business and customer needs. Fast: Deploy new systems in weeks instead of months, set up IT services in seconds, and fix problems before they disrupt operations Simple: Manage as one instead of as many with an intuitive, unified tool Efficient: Automate manual processes, increase productivity, reduce staff costs by up to 217% and TCO by up to 40% more than the competition Note: Network convergence refers to the provision of telephone, video and data communication services within a single network. In other words, one pipe is used to deliver all forms of communication services. The process of Network Convergence is primarily driven by development of technology and demand. One main goal of such integration is to deliver better services and lower prices to consumers. Users are able to access a wider range of services, choose among more service providers.
