Once the latest Fortinet FCP\_FMG\_AD-7.4 training materials have been developed successfully, our system will automatically send you an email at once, We have Pdf version that you can print it out and it is very easy to read.

**NEW QUESTION: 1** Which of the following registry hives stores information about the file extensions that are mapped to their corresponding applications?  
**A.** HKEY\_USERS  
**B.** HKEY\_LOCAL\_MACHINE  
**C.** HKEY\_CURRENT\_USER  
**D.** HKEY\_CLASSES\_ROOT  
**Answer: D**

**NEW QUESTION: 2** A. Option B B. Option A C. Option D D. Option C  
**Answer: C**  
**Explanation:** The IP source binding table has bindings that are learned by DHCP snooping or are manually configured (static IP source bindings). An entry in this table has an IP address, its associated MAC address, and its associated VLAN number. The switch uses the IP source binding table only when IP source guard is enabled. You can configure IP source guard with source IP address filtering, or with source IP and MAC address filtering. When IP source guard is enabled with this option, IP traffic is filtered based on the source IP address. The switch forwards IP traffic when the source IP address matches an entry in the DHCP snooping binding database or a binding in the IP source binding table. When IP source guard is enabled with this option, IP traffic is filtered based on the source IP and MAC addresses. The switch forwards traffic only when the source IP and MAC addresses match an entry in the IP source binding table. If there is no match, the packets are assumed to be spoofed and will be discarded.
