NEW QUESTION: 1 프로젝트 팀원은 모든 기능이 제공되는 경우 일부 대체 설계에 고객을 참여시킬 필요가 없다고 결정합니다. 전체 팀은 최상의 제품 설계에 대해서만 기술 부서에 참여하기로 결정합니다. 사용자 승인 테스트 후 고객은 선택한 설계에 대해 불만을 표시합니다. 고객이 프로젝트 결과물을 수락 함 프로젝트 관리자는 어떻게 해야 합니까?**A.** 합의 된 모든 기능 요구 사항을 충족하는 프로젝트 결과물을 수락하도록 고객에게 요청**B.** 제품 디자인이 기술 팀에 의해 결정된다는 것을 고객에게 알립니다.**C.** 설계 문제로 문제 로그를 업데이트하고 프로젝트 실행을 계속합니다.**D.** 고객과 기술 팀이 공동으로 새로운 제품 설계를 선택하도록 합니다.**Answer: D**

NEW QUESTION: 2 DRAG DROP You are developing an ASP.NET MVC application in Visual Studio 2012. The application processes data for a bakery and contains a controller named BagelController.es that has several actions. The GetBagel action is defined in the following code segment. The GetBagel action is the only action that should be accessed via a URL pattern. Routes to the other actions in the controller must be suppressed. The default route must map to HomeController and the Index action. You need to build the routes. Which three code segments should you use in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)**Answer:** Explanation: Explanation

NEW QUESTION: 3 You have an Exchange Server 2013 organization named for A. Datum Inc. A user named User1 is a member of the Domain Admins group. User1 fails to synchronize a new Windows Phone device by using Exchange ActiveSync and receives an HTTP 500 error message. User1 successfully logs on to Outlook Web App and Outlook Anywhere. You need to ensure that User1 can synchronize the new Windows Phone device by using Exchange ActiveSync. Which two tasks should you perform? (Each correct answer presents a complete solution. Choose two.)**A.** Disable permission inheritance on the User1 user account.**B.** Modify the Exchange ActiveSync policy that applies to User1's mailbox.**C.** Install a trusted root certificate on the Windows Phone device.**D.** Enable permission inheritance on the User1 user account.**E.** Create a new mobile device mailbox policy.**Answer: B, D** Explanation: Explanation/Reference:

Explanation: HTTP 500 ERROR MESSAGE The Web server (running the Web Site) encountered an unexpected condition that prevented it from fulfilling the request by the client (e.g. your Web browser or our CheckUpDown robot) for access to the requested URL. **B** Simply check include inheritable permissions from this object's parent. **INHERITABLE PERMISSIONS NOT A** Need to enable permission inheritance on the User1 user account not disable it **NOT C** This solution will fix a different error. (Error 80072F0D) error This error can occur when the root certificate authority that generated the SSL certificate being used by the Exchange server is not trusted by the Windows Phone device. This will commonly occur with Exchange servers that are still configured to use a self-signed certificate, or that have a certificate issued from a private CA. **NOT D** No need to create a new policy but need to modify the existing policy **E** It appears that Exchange ActiveSync for User 1's mailbox may not be enabled. Use the EAC to enable or disable Exchange ActiveSync In the EAC, navigate to Recipients > Mailboxes. In the list of user mailboxes,

click the mailbox that you want to enable or disable Exchange ActiveSync for, and then click Edit. On the mailbox properties page, click Mailbox Features. Under Mobile Devices, do one of the following: To disable Exchange ActiveSync click Disable Exchange ActiveSync. A warning appears asking if you're sure you want to disable Exchange ActiveSync. Click Yes. To enable Exchange ActiveSync, click Enable Exchange ActiveSync. Click Save to save your change. Exchange ActiveSync mailbox policies control how users use and synchronize their mobile devices in your organization. When you change an Exchange ActiveSync device policy, it affects all users whose mailbox is associated with that policy. The policy you set as the default automatically affects all users in the organization except those you have explicitly assigned different device policies to. Not all mobile devices support all the Exchange ActiveSync policy settings. If a policy setting isn't supported on a particular device, the device may not apply the setting. You can control whether devices that don't support specific policies are allowed to connect in the General settings for the policy.
