**NEW QUESTION: 3****A.** Option **B.** Option **D.** Option **C.** Option **A****Answer: A,D**Explanation:A: correct because yes, you have to Zone and mask to allow only the Hosts in that you want in. Zoning has the following effects:-Reduces the number of targets and LUNs presented to a host. -Controls and isolates paths in a fabric.-Can prevent non-ESXi systems from accessing a particular storage system, and from possibly destroying VMFS data.-Can be used to separate different environments, for example, a test from a production environment.B: correct because yes you need HBAs to connect to the FC.C is obviously wrong as the FS is VMFS not NFSD is wrong because: Page 37 of the vSphere storage guide says.- For multipathing to work properly, each LUN must present the "same" LUN ID number to all ESXi hosts.
