Here, CKAD technical training can satisfy your needs.

**NEW QUESTION: 1A. Option CB. Option AC. Option BD. Option DAnswer: B**

**NEW QUESTION: 2**What is a serious complication an organization faces from the compliance perspective with international operations?**A. Multiple jurisdictionsB. Different operational proceduresC. Different capabilitiesD. Different certificationsAnswer: A****Explanation:**Explanation When operating within a global framework, a security professional runs into a multitude of jurisdictions and requirements, which often may not be clearly applicable or may be in contention with each other. These requirements can involve the location of the users and the type of data they enter into systems, the laws governing the organization that owns the application and any regulatory requirements they may have, and finally the appropriate laws and regulations for the jurisdiction housing the IT resources and where the data is actually stored, which may be multiple jurisdictions as well. Different certifications would not come into play as a challenge because the major IT and data center certifications are international and would apply to any cloud provider. Different capabilities and different operational procedures would be mitigated by the organization's selection of a cloud provider and would not be a challenge if an appropriate provider was chosen, regardless of location.
