The actions listed below are strictly prohibited [FCSS_SASE_AD-24 Interactive Practice Exam](#) unless you receive the prior written consent of the Company: 1, More importantly, we will promptly update our HPE0-V19 exam materials based on the changes of the times and then send it to you timely.

Our HPE0-V19 Online test engine is convenient and easy to learn, it supports all web browsers, All in all, our payment system and delivery system are highly efficient.

One right choice will help you avoid much useless effort.

NEW QUESTION: 1In which situations will the ASM metadata backup help you recover the ASM disk in a disk group? (Choose all that apply.)**A.** when one or more file directory paths are accidentally deleted from an ASM disk group**B.** when the data file on an ASM disk group gets corrupted**C.** when one or more disks in an ASM disk group are lost**D.** when one of the disks in a disk group is accidentally unplugged**Answer: A,C**

NEW QUESTION: 2DRAG DROPAn organization is implementing a project to simplify the management of its firewall network flows and implement security controls. The following requirements exist. Drag and drop the BEST security solution to meet the given requirements. Options may be used once or not at all. All placeholders must be filled.**Answer:** Explanation: Explanation:To permit users to work securely from home, we can use a VPN. A VPN is used to provide secure access for remote users by encrypting data sent between the remote location and the local network.To permit users to access their account only from certain countries, we need to implement risk profiling of any connecting device. Risk profiling uses rules to determine 'risk'. Rules can include source IP which would determine the country.To detect credit card information leaving the organization, we can implement a DLP (Data Loss Prevention) solution. Data loss prevention (DLP) is a strategy for making sure that end users do not send sensitive or critical information outside the corporate network.The infrastructure we should deploy to permit users to access the Internet should include a forward proxy server. A forward proxy server retrieves data from external sources on behalf of users internal to the organization. For example, a user's web browser will send a request for a web page to the forward proxy, the proxy will then request the web page from an Internet web server and then the proxy will return the web page to the web browser.The infrastructure we should deploy to permit customers to access their account balance should include a reverse proxy server. A reverse proxy server retrieves data from internal sources on behalf of users (customers) external to the organization. The reverse proxy server receives the request from an external user, retrieves the data from an internal server then returns the information to the customer.
