NEW QUESTION: 3The striking consistencies among the folk tales of any region, especially the tale plots of independentorigins, like those among a region's languages, are owing to the fact that folklore, like language, is acollective property-a socialized aspect of the culture subject to stricter and more uniform laws than fieldsin which individual creation prevails. Folk tales do contain certain variable elements-for example, thedistribution of points of emphasis and the nomenclature (vocation) and attributes of the dramaticpersonae-through which the teller's own personality and inclinations may find expression. Also, theteller's choice among the repertory of the available genres (for example, fairy tales and anecdotes) andamong the known tales within each genre often reflect the teller's preferred manner of execution, whilethe teller narrator typically assumes whichever character most closely resembles the teller. Nevertheless,whereas in written literature a creative personality is free to shape entirely new roles, including that ofnarrator, in storytelling all characters are predetermined by the tale. Attempts at biographicalinterpretation almost invariably fail to convince; the tale must come before the tellerThe passage as a whole can appropriately be viewed as**A.** an examination of the ways in which story tellers imbue well-known folk tales with their ownpersonalities**B.** an explanation as to why tellers of folk tales generally choose to conform to cultural expectations inhow they tell their tales**C.** an argument that folk tales evolve over time as a result of both cultural shifts and individual creativity**D.** an investigation into certain parallels between language in general and folk tales in particular**E.** a description of the extent of the consistencies generally observed among a region's folk tales**Answer: E****Explanation:**In the passage, the author first makes the broad point that a culture's various folk tales are remarkablyconsistent. The author then acknowledges and describes limited ways in which folk tales legitimately vary according to certain preferences of the teller, but then emphasizes the limited extent of the story teller'sdiscretion. Of the five choices, choiceE.best sums up these ideas.
