NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. Administrators use client computers that run Windows 8 to perform all management tasks. A central store is configured on a domain controller named DC1. You have a custom administrative template file named App1.admx. App1.admx contains application settings for an application named App1. From a client computer named Computer1, you create a new Group Policy object (GPO) named GPO1. You discover that the application settings for App1 fail to appear in GPO1.
