**NEW QUESTION: 3** A company has 100 client computers that run Windows 8. The client computers are connected to a corporate private network. Users are currently unable to connect from their home computers to their work computers by using Remote Desktop. You need to ensure that users can remotely connect to their office computers by using Remote Desktop. Users must not be able to access any other corporate network resource from their home computers. What should you do?  
**A.** Configure a Virtual Private Network connection.  
**B.** Configure a DirectAccess connection.  
**C.** Configure the Remote Desktop Gateway IP address in the advanced Remote Desktop Connection settings on each client.  
**D.** Configure the local resource settings of the Remote Desktop connection.  
**Answer: C**  
Explanation:  
<http://technet.microsoft.com/en-us/library/cc731435.aspx> Remote Desktop Gateway allows a home computer to remote into the work computer. The Work computer can access corporate network resources, just as if the worker was at the workstation, but the HOME COMPUTER cannot access corporate resources. RD RAPs will enable us to control remote user access to internal network resources. With RD CAPs we can control which Users or Computers can

connect via RDP.VPN provides the HOME computer with an IP Address directly of the Corporate private network, giving the HOME computer access to the corporate private resources
