NEW QUESTION: 1 -- Exhibit --
user@r1> show interfaces terse ge-1/0/0
Interface Admin Link Proto Local Remote
ge-1/0/0 up up ge-1/0/0.0 up up inet6 fe80::226:88ff:fe02:7481/64 fec0:0:0:2003::1/64
-- Exhibit --
Click the Exhibit button. You run the command show interfaces terse ge-1/0/0 and see the output shown in the exhibit. Why are two addresses being shown for this interface?
A. Two addresses are assigned in IPv6, one for the physical and one for the logical interface.
B. Two addresses are seen because the loopback address of the router is associated with the interface.
C. The two addresses being seen are the link-local and site-local.
D. An IPv6 address conflict is being seen; verify your interface configuration for problems.
Answer: C

NEW QUESTION: 2 Your customer wants to acquire HPE OneView Advanced licenses for servers they plan to purchase in the future. They would like a pay-as-you-go approach in which they only pay for the licenses as they are used. Which HPE licensing feature addresses this customer's request?
A. Activation Key Agreement
B. Tracking license
C. GNU license
D. iLO Advanced
Answer: A

NEW QUESTION: 3 Refer to the exhibit. Which two effects of this configuration are true? (Choose two)
A. If a user attempts to log in as a level 15 user, the local database will be used for authentication and TACACS+ will be used for authorization
B. Configuration commands on the router are authorized without checking the TACACS+ server
C. It configures the router's local database as the backup authentication method for all TTY, console, and aux logins
D. When a user logs in to privileged EXEC mode, the router will track all user activity
E. When a user attempts to authenticate on the device, the TACACS+ server will prompt the user to enter the username stored in the router's database
F. Requests to establish a reverse AUX connection to the router will be authorized against the TACACS+ server
Answer: C,F

NEW QUESTION: 4 Metadata Workbench can display operational metadata information. Which one of the following assertions is FALSE?
A. A single business lineage report can contain lineage information about design time and run time.
B. Operational metadata is only available for DataStage/QualityStage jobs.
C. Available statistics about the execution of a DataStage job include the number of records read and written by the DataStage job, the time the job started and ended; and the stages and links used in the job.
D. The pre-defined query ?ob Operational run? displays statistical information about a DataStage job run, but does not show operational lineage.
Answer: A
