If you need more information for the SAP C\_DS\_43 Exam, check our page SAP C\_DS\_43 Dumps.

**NEW QUESTION: 1**Which of the following is the BEST way to prevent new users from connecting to a wireless access point, but still allow already connected users to continue to connect?**A.** Change the encryption type to AES 256-bit for current users.**B.** Reduce the signal strength to 0 percent.**C.** Create a MAC filter containing the current users.**D.** Turn off SSID broadcast.**Answer: C****Explanation:**MAC Filtering (or EUI filtering, or layer 2 address filtering) refers to a security access control method whereby the 48-bit address assigned to each network card is used to determine access to the network.MAC addresses are uniquely assigned to each card, so using MAC filtering on a network permits and denies network access to specific devices through the use of blacklists and whitelists. While the restriction of network access through the use of lists is straightforward, an individual person is not identified by a MAC address, rather a device only, so an authorized person will need to have a whitelist entry for each device that he or she would use to access the network.

**NEW QUESTION: 2**How do Amazon EC2 Auto Scaling groups help achieve high availability for a web application?**A.** They automatically add or replace instances across multiple Availability Zones when the application needs it**B.** They enable the application's stalk: content to reside closer to end users**C.** They automatically add more instances across multiple AWS Regions based on global demand of the application**D.** They are able to distribute incoming requests across a tier of web server instances**Answer: A**

**NEW QUESTION: 3**Which of the following is NOT one of the four continuous functions of ARM?**A.** Collecting and classifying information obtained during background scans**B.** Determining the best controller for APs to terminate**C.** Create two indices for each AP, for each channel**D.** Monitoring the environment for the current operating and alternate channels**E.** Computing the best channel and power level to operate on**Answer: B**
