Policy Automation project teams typically include both technical and nontechnical roles.C. It is common for the rule author to be the lead tester.D. It is common for the rule author to create the interview screens.E. Subject matter experts may advise on policy interpretation, but they should not write the PolicyAutomation rules.F. The primary user of Policy Modeling on a project should be the technical developer.****Answer: A,E**

**NEW QUESTION: 4****CORRECT TEXT****Answer:** **Explanation:**We need to configure policy based routing to send specific traffic along a path that is different from the best path in the routing table. Here are the step by Step Solution for this: 1) First create the access list that catches the HTTP traffic: R1(config)#access-list 101 permit tcp any any eq www 2) Configure the route map that sets the next hop address to be ISP1 and permits the rest of the traffic:  
R1(config)#route-map pbr permit 10 R1(config-route-map)#match ip address 101  
R1(config-route-map)#set ip next-hop 10.1.100.2 R1(config-route-map)#exit  
R1(config)#route-map pbr permit 20 3) Apply the route-map on the interface to the server in the EIGRP Network: R1(config-route-map)#exit R1(config)#int fa0/1 R1(config-if)#ip policy route-map pbr R1(config-if)#exit R1(config)#exit**Explanation:**First you need to configure access list to HTTP traffic and then configure that access list. After that configure the route map and then apply it on the interface to the server in EIGRP network.
