If, you are contented with Estruturit demo then you can purchase the actual D-CI-DS-23 exam product, You can get full refund or change other exam training material if you want.

NEW QUESTION: 1Case StudyBackgroundYou have a database named HR1 that includes a table named Employee.You have several read-only, historical reports that contain regularly changing totals. The reports use multiple queries to estimate payroll expenses. The queries run concurrently. Users report that the payroll estimate reports do not always run. You must monitor the database to identify issues that prevent the reports from running.You plan to deploy the application to a database server that supports other applications. You must minimize the amount of storage that the database requires.Employee TableYou use the following Transact-SQL statements to create, configure, and populate the Employee table: ApplicationYou have an application that updates the Employees table. The application calls the following stored procedures simultaneously and asynchronously:- UspA: This stored procedure updates only the EmployeeStatus column.- UspB: This stored procedure updates only the EmployeePayRate column.The application uses views to control access to data. Views must meet the following requirements:- Allow user access to all columns in the tables that the view accesses.- Restrict updates to only the rows that the view returns.ExhibitBoth of the stored procedures experience blocking issues. UspB must not abort if UspA commits changes to a row before UspB commits changes to the same row. UspA must not abort if UspB commits changes to a row before UspA commits changes to the same row.You need to specify the transaction isolation levels to enable row versioning.How should you complete the Transact-SQL statements? To answer, drag the Transact-SQL segments to the correct locations. Each Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:Explanation References: [https://technet.microsoft.com/en-us/library/ms175095\(v=sql.105\).aspx](https://technet.microsoft.com/en-us/library/ms175095(v=sql.105).aspx) [https://technet.microsoft.com/en-us/library/ms173763\(v=sql.105\).aspx](https://technet.microsoft.com/en-us/library/ms173763(v=sql.105).aspx)

NEW QUESTION: 2What does PHI stand for, as per HIPAA/ HITECH?**A.** Personal heuristic information**B.** Public health information**C.** Personal health information**D.** Protected health information**Answer: D**Explanation:Reference: https://en.wikipedia.org/wiki/Health_Insurance_Portability_and_Accountability_Act

NEW QUESTION: 3An organization is introducing agile to its projects. During an informal discussion the project manager learned that team members who are currently working on different teams are discussing how they would like to be together on the same team What should the project manager do?**A.** The project manager should allow the resources to periodically choose on which team they would like to work.**B.** The project manager should indicate that the team members have already been assigned to a team through workforce optimization**C.** The project manager should not allow resources to choose teams because the project manager assigns the resources based upon project needs**D.** The project manager should not allow resources to choose on which team they would like to work because they will

always choose their favorite team**Answer: B**
