As we all know, it's hard to delight every customer, Free demos are understandable and part of the JN0-223 Questions JNCIA-DevOps exam materials as well as the newest information for your practice.

NEW QUESTION: 1 Which three benefits make a data center core Cisco Nexus 7010 Switch an effective solution? (Choose three.) **A.** support for 24-port Gb/s line card **B.** support for data center service modules **C.** high performance **D.** virtualization **E.** IP multicast **F.** unified I/O **G.** high availability **Answer: C,F,G**

NEW QUESTION: 2 A user has forgotten their account password. Which of the following is the BEST recovery strategy? **A.** Upgrade the authentication system to use biometrics instead. **B.** Temporarily disable password complexity requirements. **C.** Retrieve the user password from the credentials database. **D.** Set a temporary password that expires upon first use. **Answer: D**
Explanation: Since a user's password isn't stored on most operating systems (only a hash value is kept), most operating systems allow the administrator to change the value for a user who has forgotten theirs. This new value allows the user to log in and then immediately change it to another value that they can (ideally) remember. Also setting a temporary password to expire upon first use will not allow a hacker the opportunity or time to use it. Incorrect Answers: **A.** Using a biometric system is not going to recover a forgotten password. **B.** Disabling password complexity requirements is not a recovery strategy rather it would be compromising your password policy. **D.** This is not sound practice to keep user passwords on a credentials database since most operating systems store user passwords hashed and the administrator will be able to change the value for a user who has forgotten theirs. References: Dulaney, Emmett and Chuck Easton, CompTIA Security+ Study Guide, 6th Edition, Sybex, Indianapolis, 2014, pp. 140-141

NEW QUESTION: 3 One benefit of completing a descriptive analysis regarding a student's in-school behavior is that it: **A.** allows the observer and student to develop rapport. **B.** frees the

classroom teacher from having to spend too much time collecting behavioral information.**C.** may provide essential information not available through other means.**D.** confirms hypotheses regarding functional relationships.**Answer: C**
