They are living throughout the world, It will help you clear all concepts and you will have to go through our 1V0-21.20 practice test questions multiple times to ensure your success in the exam.

We have a professional team to collect the first-hand information for the exam, Credited towards VMware Certified VMware Data Center Virtualization, These questions on 1V0-21.20 training pdf are selected by our professional expert team and are designed to not only test your knowledge and ensure your understanding about the technology about 1V0-21.20 actual test but also mater the questions and answers similar with the real test.

An effective tool is necessary to manage great work, You **Reliable 1V0-21.20 Exam Cram** just need to open the App version of the study guide with a fast internet connection for the first time.

Privacy Protection Absolute private **Reliable 1V0-21.20 Exam Cram** purchase without sharing your personal information.

NEW QUESTION: 1 Jabber cannot log in via Mobile and Remote Access. You inspect Expressway-C logs and see this error message: XCP_JABBERD Detail="Unable to connect to host '%IP%', port 7400:(111) Connection refused" Which is the cause of this issue? **A.** The destination port for Expressway-E is set to 7400 instead of 8443 on the Expressway-C. **B.** Rich Media Session licenses are not activated on Expressway-E. **C.** Expressway-E is listening on the wrong IP interface. **D.** The XCP Service is not activated on Expressway-E. **Answer: C**

NEW QUESTION: 2 A. Option D B. Option B C. Option C D. Option A **Answer: C**

NEW QUESTION: 3 which add prefix does OSPFv3 use when multiple IPv6 address are configured on a single interface ? **A.** the prefix that the administrator configure for OSPFv3 use **B.** all prefix on the interface **C.** the lowest prefix on the interface **D.** the highest prefix on the interface **Answer: B** Explanation: Reference: http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/iproute_ospf/configuration/15-sy/iro-15-sy-book/ip6-routeospfv3.html#GUID-05F3F09C-FE3E-41D6-9845-111FB17AD030 "In IPv6, you can configure many address prefixes on an interface. In OSPFv3, all address prefixes on an interface are included by default. You cannot select some address prefixes to be imported into OSPFv3; either all address prefixes on an interface are imported, or no address prefixes on an interface are imported."

NEW QUESTION: 4 ABC company has a lot of contractors working for them. The provisioning team does not always get notified that a contractor has left the company. Which of the following policies would prevent contractors from having access to systems in the event a contractor has left? **A.** Account lockout policy **B.** Annual account review **C.** Account expiration policy **D.** Account disablement **Answer: C** Explanation: Account expiration is a secure feature to employ on user accounts for temporary workers, interns, or consultants. It automatically disables a user account or causes the account to expire at a specific time and on a specific day. Incorrect Answers: A. An account review would conclude if users have been suitably completing their work tasks or whether there have been failed and/or successful attempts at violating company policies or the law. It would not prevent contractors from having access to systems in the event a contractor has left. C. Account lockout automatically disables an account due to repeated failed log on attempts. It would not prevent contractors from having access to

systems in the event a contractor has left.D. The question states: "The provisioning team does not always get notified that a contractor has left the company".Therefore, disabling an account needs to happen automatically. The account expiration policy meets the requirements.
