Answer: A
Explanation:
http://backdrift.org/man/netapp/man1/na_lun.1.html lun clone create clone_lunpath [-o noreserve] -b parent_lunpath parent_snap

NEW QUESTION: 2**A.** Option **D****B.** Option **B****C.** Option **A****D.** Option **E****E.** Option **C****Answer: D**
Explanation:ExplanationAbout Altering the Default Full Data Redaction ValueYou can alter the default displayed values for full Data Redaction polices. By default, 0 is the redacted value when Oracle Database performs full redaction (DBMS_REDACT.FULL) on a column of the NUMBER data type. If you want to change it to another value (for example, 7), then you can run

the DBMS_REDACT.UPDATE_FULL_REDACTION_VALUES procedure to modify this value. The modification applies to all of the Data Redaction policies in the current database instance. After you modify a value, you must restart the database for it to take effect. Note: * The DBMS_REDACT package provides an interface to Oracle Data Redaction, which enables you to mask (redact) data that is returned from queries issued by low-privileged users or an application. * UPDATE_FULL_REDACTION_VALUES Procedure This procedure modifies the default displayed values for a Data Redaction policy for full redaction. * After you create the Data Redaction policy, it is automatically enabled and ready to redact data. * Oracle Data Redaction enables you to mask (redact) data that is returned from queries issued by low-privileged users or applications. You can redact column data by using one of the following methods: / Full redaction. / Partial redaction. / Regular expressions. / Random redaction. / No redaction.

NEW QUESTION: 3 どの3つのプロセスがVisual Workflowのユースケースですか？
