NEW QUESTION: 1An investigator recently discovered that an attacker placed a remotely accessible CCTV camera in a public area overlooking several Automatic Teller Machines (ATMs). It is also believed that user accounts belonging to ATM operators may have been compromised. Which of the following attacks has MOST likely taken place?
A. Whaling attack
B. Dumpster diving
C. Vishing attack
D. Shoulder surfing
Answer: D
Explanation: Section: Threats and Vulnerabilities
Explanation/Reference: Explanation: The CCTV camera has recorded people entering their PINs in the ATMs. This is known as shoulder surfing. Shoulder surfing is using direct observation techniques, such as looking over someone's shoulder, to get information. Shoulder surfing is an effective way to get information in crowded places because it's relatively easy to stand next to someone and watch as they fill out a form, enter a PIN number at an ATM machine, or use a calling card at a public pay phone. Shoulder surfing can also be done long distance with the aid of binoculars or other vision-enhancing devices. To prevent shoulder surfing, experts recommend that you shield paperwork or your keypad from view by using your body or cupping your hand.

NEW QUESTION: 2You are testing an existing ASP.NET page. The page includes a text box that you are able to execute malicious JavaScript code by typing it in the text box and submitting. You need to configure the page to prevent JavaScript code from being submitted by the text box. In the @ Page directive, which attribute should you set to true?
