We will prove to you that your choice is a right one, [Valid PMO-CP Study Notes](#) Using distinctive dumps makes your test more effective and easily-pass to save your much cost and time.

**NEW QUESTION: 1**Which CLI command shows the controller configuration in a way that is similar to the way that it is displayed on Cisco IOS routers?**A.** show running config**B.** show config**C.** show run config**D.** show run-config**E.** show running-config**Answer: E****Explanation:** Explanation/Reference:Explanation:

**NEW QUESTION: 2**What is a unique value proposition for IBM UrbanCode Deploy in a hybrid cloud environment?**A.** it supports deployment to cloud platforms supporting OpenStack, CloudFoundry and Docker.**B.** it turns on mobile devices.**C.** n includes application analytics as a part of application deployment.**D.** it supports performance and stress testing of cloud infrastructure.**Answer: A**

**NEW QUESTION: 3**A technician installs a new server that runs Windows Server 2012 R2.During the installation of Windows Server Update Services (WSUS) on the new server, the technician reports that on the Choose Languages page of the Windows Server Update Services Configuration Wizard, the only available language is English.The technician needs to download updates in French and English.What should you tell the network technician to do to ensure that the required updates are available?**A.** Complete the Windows Server Update Services Configuration Wizard, and then modify the update language on the server.**B.** Change the System Local of the server to French.**C.** Uninstall all instances of the Windows Internal Database.**D.** Change the update languages on the upstream server.**Answer: D****Explanation:** Configure upstream servers to synchronize updates in all languages that are required by downstream replica servers. You will not be notified of needed updates in the unsynchronized languages. The Choose Languages page of the WSUS Configuration Wizard allows you to get updates from all languages or from a subset of languages. Selecting a subset of languages saves disk space, but it is important to choose all the languages that are needed by all the downstream servers and client computers of a WSUS server. Downstream servers and client computers will not receive all the updates they need if you have not selected all the necessary languages for the upstream server. Make sure you select all the languages that will be needed by all the client computers of all the downstream servers. You should generally download updates in all languages on the root WSUS server that synchronizes to Microsoft Update. This selection guarantees that all downstream servers and client computers will receive updates in the languages that they require. To choose update languages for a downstream server: If the upstream server has been configured to download update files in a subset of languages: In the WSUS Configuration Wizard, click Download updates only in these languages (only languages marked with an asterisk are supported by the upstream server), and then select the languages for which you want updates.
