As old saying says, different strokes for different folks.

NEW QUESTION: 1 Which aspect of Self-Service Configuration allow a customer to create a service request? Choose the correct answer. **A.** Branding **B.** QR Codes **C.** Moment-sets **D.** Workflow assignments **Answer: B**

NEW QUESTION: 2 The CMDB: **A.** Is updated by Configuration Management staff at the end of each working day **B.** Must be available for update 7 x 24 if any of the services supported by the IT supplier are available 7 x 24 **C.** Holds information that will be useful to the majority of IT Service Management processes **D.** Must be verified for accuracy monthly with trend reports on errors distributed to management quarterly **Answer: C**

NEW QUESTION: 3 Select a valid VRRP configuration from a list of possible configurations. (Choose three.) **A.** vrrp [group-number] ip [ip-address] **B.** vrrp [group-number] preempt **C.** standby [group number] priority [priority] **D.** standby [group number] preempt **E.** vrrp [group-number] priority [priority] **Answer: A, B, E** Explanation: You can eliminate configurations with the word `standby`, as that would be HSRP, not VRRP. Also, I think the options that put things like vrrp group 1 ip x.x.x.x are wrong. You don't need the word `group` in the configuration line. The number 1 is the group number. Anyway, just take a good look at a few valid VRRP configuration examples so that you will be able to recognize invalid ones.

NEW QUESTION: 4 **A.** RAID controller **B.** Hard drive **C.** SSD **D.** System fan **Answer: B**
