Interactive "Testing Engine" available for Adobe Adobe Information Management AD0-E330,.

NEW QUESTION: 1You are an independent project manager who uses Project Professional 2013. You work on multiple projects for different customers and use only one project to manage their tasks. You invoice your customers on a monthly basis. To identify tasks that have not been invoiced, you create a custom field called Not Invoiced. Without losing the original project tasks' sort order, and without hiding any information, you need to see all tasks which have not been invoiced. You create a custom filter based on the Not Invoiced custom field. What should you do next? **A.** Use the filter in the Group By function. **B.** Export to Microsoft Excel using the custom filter. **C.** Apply the custom filter and select the Highlight option. **D.** Apply the custom filter. **Answer: C**

NEW QUESTION: 2You plan to deploy logical Azure SQL Database servers to the East US Azure region and the West US Azure region. Each server will contain 20 databases. Each database will be accessed by a different user who resides in a different on-premises location. The databases will be configured to use active geo-replication. You need to recommend a solution that meets the following requirements: Restricts user access to each database Restricts network access to each database based on each user's respective location Ensures that the databases remain accessible from client applications if the local Azure region fails What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation:

NEW QUESTION: 3What authority to the IBM Tivoli Business Service Manager V6.1 (TBSM) databases is the user given in order to run the script to create the TBSM databases? **A.** SYSADM **B.** CREATETABC. **C.** SELECTD. **D.** DBADM **Answer: D**

NEW QUESTION: 4Depending on the complexity of an organization's business continuity plan (BCP), the plan may be developed as a set of more than one plan to address various aspects of business continuity and disaster recovery, in such an environment, it is essential that: **A.** all plans are integrated into a single plan. **B.** each plan is consistent with one another. **C.** each plan is dependent on one another. **D.** the sequence for implementation of all plans is defined. **Answer: B** Explanation: Depending on the complexity of an organization, there could be more than one plan to address various aspects of business continuity and disaster recovery. These do not necessarily have to be integrated into one single plan. However, each plan has to be consistent with other plans to have a viable business continuity planning strategy. It may not be possible to define a sequence in which plans have to be implemented, as it may be dependent on the nature of disaster, criticality, recovery time, etc.
