C. Configure role, password, and secondary Whitewater IP on the primary Whitewater appliance.**D.** Configure role, password, and megastore ID on the primary Whitewater appliance.
Answer: A,C

NEW QUESTION: 2Where do UI objects and Launchpad data stored?Please choose the correct answer. Response:**A.** Back End Server**B.** SAP Web Dispatcher**C.** SAP Hana**D.** Front End Server
Answer: D

NEW QUESTION: 3With the objective of mitigating the risk and impact of a major business interruption, a disasterrecovery plan should endeavor to reduce the length of recovery time necessary, as well as costs associated with recovery. Although DRP results in an increase of pre-and post-incident operational costs, the extra costs are more than offset by reduced recovery and business impact costs. True or false?**A.** False**B.** True**Answer: B**
Explanation: Explanation/Reference:With the objective of mitigating the risk and impact of a major business interruption, a disaster-recovery plan should endeavor to reduce the length of recovery time necessary and the costs associated with recovery. Although DRP results in an increase of pre-and post-incident operational costs, the extra costs are more than offset by reduced recovery and business impact costs.

NEW QUESTION: 4A multi-national company has a highly mobile workforce and minimal IT infrastructure. The company utilizes a BYOD and social media policy to integrate presence technology into global collaboration tools by individuals and teams. As a result of the dispersed employees and frequent international travel, the company is concerned about the safety of employees and their families when moving in and out of certain countries. Which of the following could the company view as a downside of using presence technology?**A.** Network reconnaissance**B.** Industrial espionage**C.** Insider threat**D.** Physical security**Answer: D**
Explanation:If all company users worked in the same office with one corporate network and using company supplied laptops, then it is easy to implement all sorts of physical security controls. Examples of physical security include intrusion detection systems, fire protection systems, surveillance cameras or simply a lock on the office door. However, in this question we have dispersed employees using their own devices and frequently traveling internationally. This makes it extremely difficult to implement any kind of physical security.Physical security is the protection of personnel, hardware, programs, networks, and data from physical

circumstances and events that could cause serious losses or damage to an enterprise, agency, or institution. This includes protection from fire, natural disasters, burglary, theft, vandalism, and terrorism.
