NEW QUESTION: 4You manage an application running on Azure Web Sites Standard tier. The application uses a substantial amount of large image files and is used by people around the world.Users from Europe report that the load time of the site is slow.You need to implement a solution by using Azure services.What should you do?**A. Configure Azure CDN to cache site images and content stored in Azure blob storage.B. Configure Azure Web Site auto-scaling to increase instances at high load.C. Configure Azure CDN to cache all responses from the application web endpoint.D. Configure Azure blob storage with a custom domain.Answer: A**Explanation:Blobs that benefit the most from Azure CDN caching are those that are accessed frequently during their time-to-live (TTL) period. A blob stays in the cache for the TTL period and then is refreshed by the blob service after that time is elapsed. Then the process repeats.
