I. at least one of the M&M assumptions must be false.  
II. there must be signaling effects involved.  
III. investors are behaving irrationally.

**F.** I only  
**Answer: F**  
**Explanation:** Explanation/Reference: Explanation: If all of the M&M assumptions held, a change in dividend policy would not cause the stock price to change; dividend policy would be irrelevant. However, one does not necessarily need signaling effects to account for market behavior. Other theories like the Bird-in-the-Hand theories can also explain the phenomenon in the presence of transaction costs. In itself, then, the phenomenon does not imply that the market is behaving irrationally.
