NEW QUESTION: 1As an HR Administrator, you want to add an additional assignment for an existing worker. You access the worker's information via the Manage Employment task, select Update, and enter an Effective Date, but you are unable to select the Add Assignment action from the Action field dropdown. What is preventing you from selecting the action?**A.** The employee has no active work relationships.**B.** Employment Model 2-Tier multiple assignments have not been enabled at the enterprise and/or the legal entity level.**C.** The employee already has multiple assignments within that legal employer.**D.** The employee has a suspended assignment.**Answer: D**

NEW QUESTION: 2You use Amazon CloudWatch as your primary monitoring system for your web application. After a recent software deployment, your users are getting Intermittent 500 Internal Server Errors when using the web application. You want to create a CloudWatch alarm, and notify an on-call engineer when these occur. How can you accomplish this using AWS services? Choose 3 answers**A.** Use AWS Data Pipeline to stream web application logs from your servers to CloudWatch.**B.** Use Amazon Simple Notification Service to notify an on-call engineer when a CloudWatch alarm is triggered.**C.** Deploy your web application as an AWS Elastic Beanstalk application. Use the default Elastic Beanstalk Cloudwatch metrics to capture 500 Internal Server Errors. Set a CloudWatch alarm on that metric.**D.** Create a CloudWatch Logs group and define metric filters that capture 500 Internal Server Errors. Set a CloudWatch alarm on that metric.**E.** Install a CloudWatch Logs Agent on your servers to stream web application logs to CloudWatch.**F.** Use Amazon Simple Email Service to notify an on-call engineer when a CloudWatch alarm is triggered.**Answer: B,D,E**

NEW QUESTION: 3Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated

goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a database that tracks orders and deliveries for customers in North America. The database contains the following tables: Sales, Customers, Application, Cities, Sales, Customer, Categories. The company's development team is designing a customer directory application. The application must list customers by the area code of their phone number. The area code is defined as the first three characters of the phone number. The main page of the application will be based on an indexed view that contains the area and phone number for all customers. You need to return the area code from the PhoneNumber field. Solution: You run the following Transact-SQL statement: Does the solution meet the goal? **A. Yes** **B. No** **Answer: A** **Explanation:** Explanation/Reference: Explanation: The following indicates a correct solution: The function returns a nvarchar(10) value. Schemabinding is used. SELECT TOP 1 ... gives a single value Note: nvarchar(max) is correct statement. nvarchar [(n | max)] Variable-length Unicode string data. n defines the string length and can be a value from 1 through 4,000. max indicates that the maximum storage size is 2
