NEW QUESTION: 1When a voicemail message is left for a user, where are the voice files held if the customer is using EmbeddedVoicemail?**A.** on the User PCB**B.** on the SD card**C.** on the UCMD**D.** on the voicemail server**Answer: B**

NEW QUESTION: 2Which option describes how OBIEE Integrates with Planning?**A.** OBIEE integrates with Planning directly through relational database access.**B.** OBIEE primarily accesses Planning using standard Essbase integration techniques.**C.** Planning is not a supported OBIEE source.**D.** OBIEE provides complete access to all Planning data through the Analytic Data Model (ADM) layer.**Answer: B****Explanation:**A:*Combining Relational and OLAP Data Sources: Oracle's Common Enterprise Information Model allows users to combine data from a relational system and an OLAP source in a single calculation.For example, a user can compare sales forecasts from an Oracle CRM System with budget data from an Oracle Essbase planning application. To clients of the Common Enterprise Information Model, the forecast and budget data appear to be from the same logical source.*The Essbase server provides advanced multi-user read and write capabilities, including data update and multi-user recalculation. Business users with front-end tools can write data back to a server and recalculate the data on a server using calculation scripts-key functionality to support sophisticated modeling and planning applications.*Using aggregate storage, Essbase serves a wide range of analytic needs-financial analysis, planning, budgeting, sales analysis, marketing analysis, supply-chain analysis, and profitability analytics-all from a single analytic infrastructure.Note 2: Data model for business intelligence The most important component of business intelligence is the concept of 'data model'. data model determine what kind of analysis that end user could do with the data. It is also an independent concept that could span across different vendor 's product. Unlike data model of the transaction system, the typical analytic data model is often denormalized and store extra data for analytic query and better query performance while transaction data model use is often normalized and optimized for a few data read and write, which is implemented by joining many tables.The most common used analytic data model in business intelligence is call the 'Star schema' data model.With the Oracle business intelligence system, We could define star schema and dimension data model in the 'logical layer' in the admin tools. The data model in OBIEE could span different data source in physical layer, which means OBIEE have the capability of building one logical data model which is actually connect

to different database in the backend

NEW QUESTION: 3 Which of the following sub-processes of IT Service Continuity Management is used to make sure that all members of IT staff with responsibilities for fighting disasters are aware of their exact duties? **A.** ITSCM Training and Testing **B.** Design Services for Continuity **C.** ITSCM Support **D.** ITSCM Review **Answer: C**
