And you can just visit our website to know its advantages.

**NEW QUESTION: 1** A customer is asking you to explain the difference between a data breach and a data leak. Does this explain the difference? (In both cases, data has left your network for the outside. A data breach is executed by an outside attacker, while a data leak is executed either deliberately or accidentally by an inside actor.)**A. No B. Yes Answer: B**

**NEW QUESTION: 2** A zoo is in the process of introducing a new IT system to improve its processes and drive greater efficiency in its operations. It has received permission from the board of directors for a phased approach to introduce new business functionality and to replace manual processes with digital solutions. The key areas for inclusion in the first phase are a new animal health monitoring system, which will allow the zookeepers to utilize the power of data analytics to monitor and proactively manage the health of the animals. It will also provide them with a way of accurately recording the birth of new animals and record loans of animals to other zoos around the world. On the public-facing side, the project will provide customers with an adoption scheme, which will raise much-needed funds. A business analyst has constructed a use case diagram for the zoo: The following potential statements have been made about the diagram: **A) The diagram is a correct representation of the scenario. B) There are aspects of the scenario which are incorrectly represented in the diagram. C) There are aspects of the scenario which are incorrectly omitted from the diagram. D) The notation used in the diagram is incorrect.** Which of them is/are true? **A. B and C B. C and D C. BD. A Answer: C**
