#### **NEW QUESTION: 1**

アナリストが犯罪に関する調査を行っています。アナリストは、イベントリストの外部宛先IPアドレスの一部が誰に登録されているかがわかりません。

アナリストは、IPアドレスが誰に登録されているかをどのように確認できますか？ **A.**

宛先アドレスを右クリックし、[その他のオプション]、[ナビゲート]、[宛先の概要]の順にクリックします **B.** 宛先アドレス、[その他のオプション]、[IP所有者]の順に右クリックします **C.**

宛先アドレス、[その他のオプション]、[情報]、[DNSルックアップ]の順に右クリックします **D.**

宛先アドレス、[その他のオプション]、[情報]、[WHOISルックアップ]の順に右クリックします

**Answer: A**

**NEW QUESTION: 2** A firm should cease to do business when: **A.** Price average variable cost **B.**

Price average total cost **C.** Price marginal cost **Answer: A** Explanation: A firm should cease to do business when  $P < AVC$ . In this case the company is not even making incremental revenue for each additional product sold. When  $AVC > P > ATC$ , the firm while not profitable will be making money above its variable costs. If  $P > MC$  or  $ATC > MC$ , the firm may be profitable but not maximizing profit potential.

**NEW QUESTION: 3** Your IT department needs to run a custom-built TCP application within the clientless SSL VPN tunnel. The network administrator suggests running the smart tunnel application. Which three statements concerning smart tunnel applications are true? (Choose three.) **A.** They require the modification of the Host file on the end-user PC. **B.** They require the enabling of port forwarding. **C.** They do not require administrator privileges on the remote system. **D.** They support active FTP and other RTSP-based applications. **E.** They support native client applications over SSL VPN. **F.** They are supported on Windows and MAC OS X platforms.

**Answer: C, E, F** Explanation: Smart Tunnel-Connects a Winsock 2, TCP-based application installed on the end station to a server on the intranet, using a clientless (browser-based) SSL VPN session with the security appliance as the pathway, and the security appliance as a proxy server. - Smart Tunnel List-Select the list name from the drop-down menu if you want to provide smart tunnel access. Assigning a smart tunnel list to a group policy or username enables smart tunnel access for all users whose sessions are associated with the group policy or username, but restricts smart tunnel access to the applications specified in the list. To view, add, modify, or delete a smart tunnel list, click the adjacent Manage button. - Auto Start (Smart

Tunnel List)-Check to start smart tunnel access automatically upon user login. Uncheck to enable smart tunnel access upon user login, but require the user to start it manually, using the Application Access > Start Smart Tunnels button on the Clientless SSL VPN Portal Page.- Auto Sign-on Server List-Select the list name from the drop-down menu if you want to reissue the user credentials when the user establishes a smart tunnel connection to a server. Each smart tunnel auto sign-on list entry identifies a server with which to automate the submission of user credentials. To view, add, modify, or delete a smart tunnel auto sign-on list, click the adjacent Manage button.- Domain Name (Optional)-Specify the Windows domain to add it to the username during auto sign-on, if the universal naming convention (domainusername) is required for authentication. For example, enter CISCO to specify CISCOjsmith when authenticating for the username jsmith. You must also check the "Use Windows domain name with user name" option when configuring associated entries in the auto sign-on server list.
