Main principles of company to help exam candidates, Give [D-ISM-FN-23 Latest Test Prep](#) us one chance, you will not regret for that, Our high passing rate is the leading position in this field.

With the options to highlight missed questions, you can analyze **CFE Latest Exam Materials** your mistakes and repeatedly practice until you really remember it, If you don't pass, we won't earn you any money.

You can help your friends or colleagues to pass test, We guarantee that if you study our CFE guide materials with dedication and enthusiasm step by step, you will desperately pass the exam without doubt.

**NEW QUESTION: 1**You manage a network that includes an on-premises Active Directory Domain Services domain and an Azure Active Directory (Azure AD). Employees are required to use different accounts when using on-premises or cloud resources. You must recommend a solution that lets employees sign in to all company resources by using a single account. The solution must implement an identity provider. You need to provide guidance on the different identity providers. How should you describe each identity provider? To answer, select the appropriate description from each list in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation Box 1: User management occurs on-premises. Azure AD authenticates employees by using on-premises passwords. Azure AD Domain Services for hybrid organizations Organizations with a hybrid IT infrastructure consume a mix of cloud resources and on-premises resources. Such organizations synchronize identity information from their on-premises directory to their Azure AD tenant. As hybrid organizations look to migrate more of their on-premises applications to the cloud, especially legacy directory-aware applications, Azure AD Domain Services can be useful to them. Example: Litware Corporation has deployed Azure AD Connect, to synchronize identity information from their on-premises directory to their Azure AD tenant. The identity information that is synchronized includes user accounts, their credential hashes for authentication (password hash sync) and group memberships. User accounts, group memberships, and credentials from Litware's on-premises directory are synchronized to Azure AD via Azure AD Connect. These user accounts, group memberships, and credentials are automatically available within the managed domain. Box 2: User management occurs on-premises. The on-premises domain controller authenticates employee credentials. You can federate your on-premises environment with Azure AD and use this federation for authentication and authorization. This sign-in method ensures that all user authentication occurs on-premises. **NEW QUESTION: 2**Company Background Corporate Information **A.** Centralized decision-making and decentralized purchasing **B.** Datum owns the following interests in two affiliate companies: 51 percent of Contoso, Ltd. 100 percent of Fabrikam, Inc. The number of employees for each company is shown in the following table: **C.** Decentralized decision-making and centralized purchasing **D.** Centralized decision-making and centralized purchasing **E.** Decentralized decision-making and decentralized purchasing **F.** Datum 100 employees Contoso 50 employees Fabrikam 10 employees All three companies have a flexible work environment that allows employees to work home. The employees in all three companies share customers and collaborate on projects. Existing Environment Existing Licensing Solution The two affiliate companies purchase their licenses separately from A. Datum and often pay a higher price for their software. A. Datum approves all purchasing decisions. Existing IT Environment Employees of all three companies have their own desktops. The desktops run Windows XP Professional or Windows Vista Business, and various versions of Microsoft Office. The company has five servers that run Windows Server 2003 The IT department upgrades software every two years. Business Requirements Planned Changes Company growth is expected to increase both the amount of

sales and the number of employees over the next three years.**G.** Datum plans to implement Microsoft Office SharePoint Server (MOSS) so that employees can collaborate on projects. All sales staff will receive a PDA so that they can access Exchange while they are out of the office. Business Problem The IT department has a limited training budget. As a result, the IT staff finds it difficult to maintain newly deployed software. Business Goals **H.** Datum has the following business goals: Allow all employees to access the resources on all servers. Upgrade the servers in all three companies to run the latest version of Windows Server. Standardize the desktop operating systems in all three companies. Standardize the desktop applications in all three companies. Implement the latest version of Microsoft Exchange Server in all three companies in the next six months. Ensure that all employees can use the current version of Outlook and Outlook Web Access. Provide remote access to Office applications by using Terminal Services. Minimize initial licensing costs. Minimize total licensing costs. Minimize the costs of technical support. Spend the entire software budget each fiscal year. Question You need to identify the purchasing model that A. Datum and its affiliated companies currently use. Which purchasing model do they currently use? **Answer: A**

**NEW QUESTION: 3** When Nora creates a new document in the Suggestion application, a number of the fields have text already displayed. But when she tabs or clicks into the field, the text disappears. What design feature has been used to create this behavior? **A.** Field Hint in the Field Properties dialog box **B.** Help Description in the Field Properties dialog box **C.** Field Assistance in the Field Properties dialog box **D.** Default Value in the Form Properties dialog box **Answer: A**
