C:\IBMSMPmaximotoolsmaximolog**D.** C:\IBMSMPsolutionslogs**Answer: C**Explanation:

Explanation/Reference:Explanation:

**NEW QUESTION: 2**Which controls can User A manage for the following Control Manager role configuration? See details ofperspective trees and control-perspective association below.**A.** Controls 1 and 2**B.** None**C.** All controls**D.** Controls 1, 2, and 4**E.** Controls 2 and 4**Answer: B**

**NEW QUESTION: 3**Your company has a private cloud that is managed by using a System Center 2012 Operations Managerinfrastructure.You have a distributed application named App1.App1 has the following service level objectives (SLOs):-At least 99.9 percent uptime-No more than 85 percent average CPU utilization You need to add the SLOs that monitor the required information to Service Level Tracking. Which SLO or SLOs should you add? (Each correct answer presents part of the solution.Choose all thatapply.)**A.** Monitor State SLO - Security**B.** Monitor State SLO - Performance**C.** Connection rule SLO**D.** Monitor State SLO - Availability**E.** Monitor state SLO - Configuration**Answer: C,D**Explanation:

<http://technet.microsoft.com/en-us/library/hh230719.aspx>To define a service level objective for an applicationOpen the Operations console with an account that is a member of the Operations Manager Administratorsuser role.Click Authoring.In the navigation pane, expand Management Pack Objects, and then click Service Level Tracking.In the Tasks pane, click Create.In the Service Level Tracking dialog box, type a name for the service level that you are defining. Forexample, type LOB Application 1. Optionally, you can provide a description. Click Next.On the Objects to Track page, under Targeted class, click Select.In the Select a Target Class dialog box, select a class for the service level, such as Distributed Application,from the list in the text box. You can search for a class by typing its name into the Look For text box. ClickOK to close the Select a Target dialog box.You can use the Scope option to specify the scope for the service level. The default selection is to use allobjects of the targeted class.Select the management pack that this service level will be saved in. You can use an existing management pack or create a new one.Click Next.On the Service Level Objectives page, click Add, and then click Monitor state SLO to create a new monitor.This monitor will track the availability of the

application. Define the state monitor as follows: In the Service level objective name text box, type a name for the service level objective. For this scenario, type Availability. From the Monitor drop-down list, choose the specific monitor that you want to use to measure the objective. For this scenario, choose Availability. Using the Service level objective goal (%) spin box, provide the numerical measure for your objective. For example, select 99.990 to indicate that your goal is 99.99% availability. You can refine what the monitor tracks to determine availability by selecting or clearing any of the following state criteria: Unplanned maintenance Unmonitored Monitoring unavailable Monitor disabled Planned maintenance Warning Click OK. On the Service Level Objectives page, click Add, and then click Collection rule SLO to create a new collection rule. This rule will track the performance of the application. Define the performance collection rule as follows: In the Service level objective name: text box, type a name for the service level objective. For this scenario, type Performance. Under Targeted class, click Select to open the Select a Target Class dialog box. Specify the target class for the rule from the list of targets in the text box. Note that this class must be contained in the distributed application. For this scenario, select the specific class the rule is targeted to, such as Windows Server 2008 Operating System. Under Performance collection rule, click Select to open the Select a Rule dialog box. Specify the performance collection rule to use. For this scenario, choose Collect Processor % Processor Time performance counter, and then click OK. Using one of the Aggregation method options, choose one of the following: Average MinMax Use the Service level objective goal drop-down list to specify either Less than or More than, and enter a value in the adjacent text box. For this scenario, choose Less Than and 80. This indicates that the performance goal is to never exceed 80% processor time. Click OK. On the Service Level Objectives page, click Next. On the Summary page, review the settings, and then click Finish. When the Completion page appears, click Close.

**NEW QUESTION: 4A** "task force" is a cross-functional group organized for a specific purpose. Task force management principles include:
