NEW QUESTION: 1 Refer to the exhibit You try to connect to a network element using a Cisco onePK application. You get this error while running the application. Which option describes the issue? **A.** There is no reachability to the network element through pings (ICMP). Routing must be checked. **B.** An ACL is configured on router that does not allow the onePK application to establish a connection. **C.** There is an error in the onePK application code, and an incorrect argument was passed in one of the APIs. **D.** A "session max" is configured on the router, and the number of sessions to the router has been exceeded. **E.** A firewall rule is blocking the onePK TCP connection to the router. **Answer: D**

NEW QUESTION: 2 You are a SharePoint administrator for Fourth Coffee. The company has 40 offices. You need to recommend a database solution that meets the company's technical requirements. Which database solution should you recommend? **A.** snapshots **B.** encryption **C.** mirroring **D.** partitioning **Answer: C** Explanation: Topic 14, Wingtip Toys Current Environment You have a Microsoft Office SharePoint Server 2007 server farm. All users authenticate to external data sources by using Single Sign-On (SSO). You plan to upgrade the server farm to SharePoint Server 2010. SharePoint Server 2007 Configurations The SharePoint Server 2007 environment contains the servers configured as shown in the following table. Servers runs Microsoft SQL Server 2005 (64-bit). Business Requirements Wingtip Toys has the following business requirements for the planned SharePoint Server 2010 deployment: --- Each department must have a separate workspace. All taxonomies must be available to all authenticated users. Users must be able to access the external data sources after the server farm is upgraded to SharePoint Server 2010. Taxonomy Requirements Wingtip Toys has the following taxonomy requirements for the planned SharePoint Server 2010 deployment: -- Taxonomies must not be replicated. All legal documents must be maintained in a dedicated taxonomy for the legal department. All financial documents must be maintained in a dedicated taxonomy for the financial department. All other company documents must be maintained in a dedicated taxonomy named Corporate. -- Technical Requirements Wingtip Toys has the following technical requirements for the planned SharePoint Server 2010 deployment: --- You must be able to monitor all performance counters and Windows events. A monitoring and alerting solution must be available for all servers in the farm. Page and output caching must be available for all users in the distribution centers. Security Requirements Wingtip Toys has the following security requirements for the planned SharePoint Server 2010 deployment: -- Only a user named User1 must be able to manage the corporate taxonomy. The financial and legal departments must be able to manage only their respective department taxonomies. User Requirements Wingtip Toys has the following user requirements for the planned SharePoint Server 2010 deployment: -- Searches must be available and up-to-date from 05:00 to 22:00, Monday to Friday. New content must be included in search results within 30 minutes of being added to the SharePoint Server 2010 servers. The indexing of new content must continue if a crawl server fails.

NEW QUESTION: 3 Refer to the exhibit. A network technician is asked to design a small network with redundancy. The exhibit represents this design, with all hosts configured in the same VLAN. What conclusions can be made about this design? **A.** The router will not accept the addressing scheme. **B.** Spanning-tree will need to be used. **C.** The connection between switches should be a trunk. **D.** The router interfaces must be encapsulated with the 802.1Q protocol. **E.** This design will function as intended. **Answer: A** **Explanation:** The proposed addressing scheme is on the same network. Cisco routers will not allow you to assign two different interfaces to be on the same IP subnet.
