E. Host_1 selects R2 as its default router and load balances between R2 and R3
Answer: C

NEW QUESTION: 2 Which software is included with VxRail and provides continuous replication of virtual machines deployed on a VxRail appliance?
A. Dell EMC RecoverPoint for VMs
B. VMware vSphere Data Protection
C. VMware VM Snapshots
D. Dell EMC RecoverPoint CRR
Answer: A

NEW QUESTION: 3 You are the security administrator for a large enterprise network with many remote locations. You have been given the assignment to deploy a Cisco IPS solution. Where in the network would be the best place to deploy Cisco IOS IPS?
A. outside the firewall of the corporate headquarters Internet connection
B. inside the firewall of the corporate headquarters Internet connection
C. at remote branch offices
D. at the entry point into the data center
Answer: C Explanation:

http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6586/ps6634/product_data_sheet0900aecd803137cf.html Product Overview In today's business environment, network intruders and attackers can come from outside or inside the network. They can launch distributed denial-of-service attacks, they can attack Internet connections, and they can exploit network and host vulnerabilities. At the same time, Internet worms and viruses can spread across the world in a matter of minutes. There is often no time to wait for human intervention-the network itself must possess the intelligence to recognize and mitigate these attacks, threats, exploits, worms and viruses. Cisco IOS Intrusion Prevention System (IPS) is an inline, deep-packet inspection-based solution that enables Cisco IOS Software to effectively mitigate a wide range of network attacks. While it is common practice to defend against attacks by inspecting traffic at data centers and corporate headquarters, distributing the network level defense to stop malicious traffic close to its entry point at branch or telecommuter offices is also critical. Cisco IOS IPS: Major Use Cases and Key Benefits IOS IPS helps to protect your

network in 5 ways:
C:Documents and Settings\user\nwz1\Desktop1.PNG
Key Benefits
Provides network-wide, distributed protection from many attacks, exploits, worms and viruses exploiting vulnerabilities in operating systems and applications
Eliminates the need for a standalone IPS device at branch and telecommuter offices as well as small and medium-sized business networks
Unique, risk rating based signature event action processor dramatically improves the ease of management of IPS policies
Offers field-customizable worm and attack signature set and event actions
Offers inline inspection of traffic passing through any combination of router LAN and WAN interfaces in both directions
Works with Cisco IOS@ Firewall, control-plane policing, and other Cisco IOS Software security features to protect the router and networks behind the router
Supports more than 3700 signatures from the same signature database available for Cisco Intrusion Prevention System (IPS) appliances

NEW QUESTION: 4 How might you edit several records from a search results page?
A. Select Enable Delete from the Options menu
B. Update the Display Options to only include editable fields
C. Update the searching filters to only include editable fields
D. Select Enable Inline Edit from the Options menu
Answer: B
