**NEW QUESTION: 3** Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have an Azure Active Directory (Azure AD) tenant named contoso.com. A user named Admin1 attempts to create an access review from the Azure Active Directory admin center and discovers that the

Access reviews settings are unavailable. Admin1 discovers that all the other Identity Governance settings are available. Admin1 is assigned the User administrator, Compliance administrator, and Security administrator roles. You need to ensure that Admin1 can create access reviews in contoso.com. Solution: You create an access package. Does this meet the goal? **A. Yes B. No** **Answer: B** **Explanation:** Explanation You do not use access packages for Identity Governance. Instead use Azure AD Privileged Identity Management. Note: PIM essentially helps you manage the who, what, when, where, and why for resources that you care about. Key features of PIM include: Conduct access reviews to ensure users still need roles References: <https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure> <https://docs.microsoft.com/en-us/azure/active-directory/governance/entitlement-management-overview>
