A. It only applies to encrypted voice calls where both parties utilize encryption. **B.** It supports encrypted TFTP operation of IP phone configuration files. **C.** It requires a remote routing device with an IPsec VPN tunnel. **D.** It intercepts and authenticates soft clients before they reach Cisco Unified Communications Manager clusters. **E.** It provides interworking to ensure that external IP phone traffic is encrypted, as long as the Cisco Unified Communications Manager cluster runs in secure mode. **F.** It manipulates the call signaling to ensure that all media is routed via the adaptive security appliance.
