If there is no network, you can copy on another computer.

NEW QUESTION: 1What performance advantage is provided by the Nonstop SQL/MP parallel query execution option?**A.** A large query is divided into smaller tasks that are assigned to separate processors and executed simultaneously.**B.** Nonstop SQL creates views from queries that extract data records from several physical data files.**C.** Multiple reports can be simultaneously generated from several physical data files.**D.** Queries from different applications can simultaneously access the same logical data file.**Answer: A**

NEW QUESTION: 2Your company has a datacenter in Los Angeles.The datacenter contains a private cloud that is managed by a System Center 2012 Virtual Machine Manager (VMM) infrastructure.The infrastructure contains two management servers and 10 Hyper-V hosts.You configure VMM to use an update server and to synchronize the updates by using a windows Server Update Services (WSUS) server named WSUS1.You attempt to verify compliance with the Sample Baseline for Security Updates.You view the console as shown in the exhibit. (Click the Exhibit button.)You need to ensure that you can verify compliance for all of the Hyper-V hosts.What should you modify?**A.** the update classifications of the update server**B.** the default configuration provider**C.** the Network settings of the All Hosts host group**D.** the Assignment Scope of the baseline**Answer: D****Explanation:**Explanation/Reference:Explanation:In the VMM console, open the Fabric workspace.On the Home tab, in the Add group, click Add Resources, and then click Update Server.The Add Windows Server Update Services Server dialog box opens.In Computer name, enter the fully qualified domain name (FQDN) of the WSUS server (for example, VMMServer01.contoso.com).Specify which TCP/IP port that the WSUS website listens on for connections (for example, port 8530).Enter credentials for connecting to the WSUS server.The account must have administrator rights on the WSUS server.If necessary, select the Use Secure Socket Layer (SSL) to communicate with the WSUS server and client's check box.Click Add.The WSUS server will be added to VMM, followed by initial synchronization of the updates catalog.Depending on how many update classifications and products you chose when you installed the WSUS server, this operation can take a long time, depending on such factors as network traffic and the load on the WSUS server.To find out the status of the operation, monitor the status of the Add Update Server and Synchronize Update Server jobs in the Jobs window or in the Jobs workspace.NoteAfter you enable update management in VMM, you should manage the WSUS server only through VMM, unless you are using a WSUS server in a Configuration Manager environment.To verify that the WSUS server was added to VMM successfully:In the Fabric workspace, on the Fabric pane, expand Servers, and click Update Server.The results pane should display the WSUS server.In the Library workspace, on the

Library pane, expand Update Catalog and Baselines, and then click Update Catalog. The results pane should display the updates that were downloaded during WSUS synchronization.

NEW QUESTION: 3 Which stored procedures need to be set up properly in order to register an XML schema?
A. XSR_REGISTER and XSR_COMPLETE
B. XSR_ADD_SCHEMA
C. The commands to register a XML schema do not invoke stored procedures.
D. XSR_REGISTER, XSR_VALIDATE and XSR_COMPLETE
Answer: A
