How long are your 1D0-724 test dumps valid, To get more useful information about our 1D0-724 practice materials, please read the following information.

NEW QUESTION: 1What are two benefits of using NAT? (Choose two.)**A.** NAT eliminates the need to re-address all hosts that require external access.**B.** Dynamic NAT facilitates connections from the outside of the network.**C.** NAT protects network security because private networks are not advertised.**D.** NAT facilitates end-to-end communication when IPsec is enabled.**E.** NAT conserves addresses through host MAC-level multiplexing.**F.** NAT accelerates the routing process because no modifications are made on the packets.**Answer: A,C**

Explanation:By not revealing the internal Ip addresses, NAT adds some security to the inside network -> F is correct.NAT has to modify the source IP addresses in the packets -> E is not correct.Connection from the outside of the network through a "NAT" network is more difficult than a more network because IP addresses of inside hosts are hidden -> C is not correct.In order for IPsec to work with NAT we need to allow additional protocols, including Internet Key Exchange (IKE), Encapsulating Security Payload (ESP) and Authentication Header (AH) -> more complex -> A is not correct.By allocating specific public IP addresses to inside hosts, NAT eliminates -> the need to re-address the inside hosts -> B is correct.NAT does conserve addresses but not through host MAC-level multiplexing. It conserves addresses by allowing many private IP addresses to use the same public IP address to go to the Internet -> C is not correct.

NEW QUESTION: 2SNMPv3 authorizes management operations only by configured users and encrypts SNMP messages. Which authentication protocols does Cisco NX-OS Software use for SNMPv3? (Choose two.)**A.** NMAC-MD5-96 authentication protocol**B.** NMAC-SHA-96 authentication protocol**C.** HMAC-SHA-96 authentication protocol**D.** HMAC-MD5-96 authentication protocol**E.** Community String Match protocol**Answer: C,D**Explanation:Cisco NX-OS uses two authentication protocols for SNMPv3: Cisco NX-OS uses Advanced Encryption Standard (AES) as one of the privacy protocols for SNMPv3 message encryption and conforms with RFC 3826.Reference:

http://www.cisco.com/c/en/us/td/docs/switches/datacenter/sw/4_2/nx-os/system_management/configuration/guide/sm_nx_os_cli/sm_9snmp.html (User-based security model, see the bullets)

NEW QUESTION: 3A new project requires resources with specific skills and competences from various departments. Since most company staff are already assigned to other project manager must identify and agree on available internal human resources, and hire external experts.What should the project manager use first to obtain resources?**A.** Negotiation skills**B.** Acquisition skills**C.** Requirements analysis tools**D.** Individual and team assessment tools**Answer: D**
